IN - ROOM SAFES

Motorized, digital electronic system with a flat keypad of contemporary lines that includes instructions for your guests in Spanish and English to avoid the hotel staff help. This system includes BRAILLE signs for disabled persons. It is provided by a emergency key hidden under keypad.

**USE.** Your guests are going to be able to protect their valuables in a simple way. When a new guest arrives in the room and programs his new code with the safe openend, the previous code is automatically deleted.

**EMERGENCY OPENING.** If a guest forgets his code, or leaves the safe locked after checking out, or if any system failure occurs, your hotel has the MASTER CODE and EMERGENCY OPENING.

**AUDIT TRAIL.** Additionally, in order to improve the security and control of undesirable thefts, DIVA safe is equipped with audit trail function. This option, save in memory the last 300 events made with user code, master and emergency key, (openings and closings). All events are listed with exact time and date and can be printed by the mini-printer included.

## Rental systems: e-rent

We offer the rental management systems adapted to hotelier specific needs:

### e-RENT

By our software e-RENT available at the hotel front-desk, it will be created a numerical encrypted code that will contain the desired using period of time. Once the code has been created, it will be given to the guest to be introduced to the safe always before entering his personal user code. After deadline of rental time it will be possible to open the safe again even when it is locked but not to close it again, so the safe will be ready for the use of a new room guest.

With this valuable tool, it is avoided the use of additional devices and this fact improves the security and assure the total renting control. The hotel management will be able to know anytime and precisely without mistake, the number of safes rented by day, week, month or year.
